No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Description

Published_Applications Nucleic Acid and Published_Applications Amino Acid database searches now generate two sets of results each. The Published_Applications databases have been split into two parts to available for processing searches.

Newly published applications will appear in the Published_Applications_New databases; older published applications make up the Published_Applications_Main databases.

Searches run against Nucleic Acid Published_Applications produce two sets of results, with the extensions .rnpbm (Published_Applications_NA_Main) and .rnpbm (Published_Applications_NA_New).
.rapbm (Published_Applications_AA_Main) and .rapbm (Published_Applications_AA_New).

Run on:

```
Sequence 4, Application US/10519447

Sequence 4, Application US/10519447

Publication No. US20050244829A1

GENERAL INFORMATION:

APPLICANT: Makoto OGINO

APPLICANT: Hideki ENDOH

TITLE OF INVENTION: METHOD FOR SCREENING AN ACENT FOR IMPROVING INSULIN RESISTANCE

FILE REFERENCE: Q85576

CURRENT APPLICATION NUMBER: US/10/519,447

CURRENT APPLICATION NUMBER: DCT/JP03/08367

PRIOR APPLICATION NUMBER: DCT/JP03/08367

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence
